

IGNITE BUSINESS GROWTH

Accredited Value Stream Mapping

BPI SERVICES
Business Performance Improvement

IGNITE BUSINESS GROWTH

Through the Ignite Business Growth pillar, we help organisations clarify their direction, strenghten their vision and define a clear sense of purpose. Together we align priorities and translate ambition into focused, actionable strategies that drive sustainable growth.

Curent State Assesment	Situational Analysis	**Value Stream Mapping**	SWOT, TOWS, PESTLE Analysis	Customer Journey Mapping
Mission & Vision Development	Strategic Thinking	Creating a Vision	Creating a Mission	Gathering feedback on Vision & Mission
Strategic Planning	Develop Strategic Three-year Goals	Cascading to One-year Strategies	Developing Goals & Strategies Metrics of Success	Strategic Plan Engagement Sessions
Strategic Plan Implementation	Develop tactical plan for the next 12 months	Gain feedback from the wider groups and catchball	Finalise and agree the Tactical plan	Develop Scorecard to measure success
Strategic Plan Review	Develop the review and monitor system	Develop the lessons learned process	Develop the recognition process	Develop the strategic effectiveness process

Featured Programme: Accredited Value Stream Mapping

Map how work and information flow through a real process in your organisation, identify delays and waste, and design a better way of working that delivers more value to customers.

PROGRAMME NAME

OVERVIEW OF THE PROGRAMME

The purpose of this programme is to equip participants with the mindset, language, and practical steps to understand, map, and improve value streams within their organization.

Programme Objective

By the end of the training, participants will have developed a clear current-state & future-state value stream map and identified key opportunities to improve flow, reduce waste, and enhance overall process performance.

Key Outcomes

At the end of this programme participants will be able to:

- Develop a Current State Value Stream Map to visualize how work, information, and materials flow through a process.
- Identify waste, bottlenecks, delays, and improvement opportunities within the current value stream.
- Design a Future State Value Stream Map that improves flow, reduces non-value-added activities, and enhances overall process performance.
- Prioritize practical improvement actions required to move from the current state to the future state.

Who is this programme for?

This programme is designed for senior leaders who want to understand how work flows across their organisation, where delays and handovers affect customers, and which improvements to prioritise. Leaders apply Value Stream Mapping to a real business process and use what they learn to agree where to focus resources.

Duration and structure

The Accredited Value Stream Mapping programme includes three workshops and two workplace assignments. Participants select a value stream from their own site, map the current state, then design a future state and develop an improvement plan. They receive feedback between workshops and submit a final presentation for grading.

Delivery format

Interactive workshops combine practical mapping exercises, breakout sessions and group discussion. Participants apply the tools to a real process at their site and receive feedback on their maps and improvement priorities.

The programme is certified by Munster Technological University (MTU). Participants are required to actively participate and develop both a current-state and a future-state value stream map for a process at their site.

PROGRAMME NAME

Core content

WORKSHOP 1 Introduction and current-state mapping	Introduce Value Stream Mapping and Lean thinking. Identify your organisation's value streams, plan and prepare for mapping, and conduct a value stream map and initial analysis.
WORKPLACE ASSIGNMENT 1 Select a value stream	Identify a suitable value stream to map at your site. Submit your selection for review and receive feedback before Workshop 2.
WORKSHOP 2 Future-state mapping and transformation planning	Use Lean techniques to review a current-state map and develop a future-state map. Cover transformation planning, implementation and ongoing value stream management.
WORKPLACE ASSIGNMENT 2 Develop your future-state map	Use the current-state map developed at your site to create a future-state map. Submit it for review and feedback.
WORKSHOP 3 Improvement plan and executive review	Review the future-state map and receive feedback. Discuss the transformation improvement plan, prepare for executive review and submit the presentation for grading.

The programme will be highly interactive, including practical exercises and breakout sessions, resulting in a shared understanding of the value stream and a concrete set of improvement priorities to pursue following the programme.
This programme is a certified programme with Munster Technological University, and participants will be required to actively participate and develop both a Current State and Future State Value Stream Map for a process within their site.
